## Education

- **Technocrats Institute of Technology**                                                                 2023
  B.tech Computer Science
  85

- **A.B.M high Secondary School**                                                                         2019
  Class 12th (Science - PCM Stream)
  72

- **A.B.M high Secondary School**                                                                         2017
  Class 10
  70

## Skills

- Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript ,Angular (with Angular Material) , Bootstrap
- Backend Technologies: Java ,Spring Boot, Spring Security, JWT (JSON Web Token)
- Database: MySQL
- DevOps & Tools: Docker Git, GitHub ,Postman
- Communication

## Achievements & Awards

- Introduction to java Coursera
- Learn Java with no programing experience Coursera
- Spring Framework : Spring 5 Fundamentals Pluralsight
- Java microservices Pluralsight
- HTML5 CSS3 Bootstrap Udemy
- Javascript Fundamentals Pluralsight
- Object Oriented programming in Javascript Pluralsight

- Generative AI for Beginners Udemy
- Certificate of Appreciation Capgemini
- Getting started with Angular Coursera

## Interests

- Coding
- Web Development UI/UX Design
- Dance

## Activities

- Participated in "No Flame Cook Competition" at Capgemini (2025) Created a healthy and innovative Cucumber Sushi dish; appreciated for creativity and presentation.

## Languages

- English
- Hindi

## Personal Details

- Nationality : India
- Github : https://GitHub.com/ZainabAnsari28

## Projects

- **Total Energies - Anael**
  Anael – HR & Payroll Management System
  Role: TMA (Technical Management Analyst) | Company Project – Capgemini

  Description: Anael is an enterprise-level software solution designed to manage end-to-end human resources and payroll operations.
  Contributions:

  Managed and optimized payroll processes to ensure seamless HR operations.

  Handled database-related tasks using Microsoft SQL Server (MSSQL), including query writing, data validation, and issue analysis.

  Collaborated with cross-functional teams to identify and resolve technical issues.

  Enhanced system performance and functionality, resulting in a significant reduction in payroll-related errors.

- **Total Energies - Spill Wizard**
  Spill Wizard – Marine Pollution Tracking System

  Role: TMA (Technical Management Analyst) | Company Project – Capgemini
  Tech Stack: Angular

  Description: Spill Wizard is an Angular-based application developed to combat marine pollution by providing real-time tools for oil slick drift tracking, hydrocarbon quantification, and ship dispersion management.

  Contributions:
  Developed and optimized front-end components using Angular.
  Built tools for real-time data visualization and interactive tracking.
  Collaborated with the product team to ensure responsive UI and functionality for environmental compliance tools.

- **Fashion Vibe – E-Commerce Website (Self Project)**
  Fashion Vibe – E-Commerce Website (Self Project)

  Role: Full Stack Developer

  Tech Stack: Angular, Bootstrap, Angular Material, Java, Spring Boot, JWT, MySQL

Description: A full-featured e-commerce web application with role-based access control and secure login using JWT authentication.

Features:
User authentication & authorization (admin/user roles).
Product listing with CRUD operations.
Secure login/signup with session handling and role-based access rights.
Responsive UI using Bootstrap and Angular Material.

- **Portfolio Website (Self Project)**
  Portfolio Website (Self Project)

  Role: Full Stack Developer

  Tech Stack: Angular, Java, Spring Boot, MySQL

  Description: A personal portfolio website to showcase projects, skills, services, certification, and experience.

  Created using Angular (frontend) and Spring Boot (backend).

  Includes dynamic project listing, contact form, and clean UI.
